# Christian Ethics

---

As Christians we need to shape our views by what God has said in the Bible.

This study on Christian ethics will consider what the Bible teaches on a number of issues where secularists have been quite vocal in imposing their religiously held views upon society and government.

Christians are often told that we cannot impose the teachings of the Bible on people's lives. Yet those who hold the view that there is no God are quite ready to impose the consequences of that view on everyone. In a society where free speech is said to be valued then the Christian voice should be allowed to be heard on ethical issues. Join us as we consider what the Biblical response should be.
